BUILD INFORMATION TECHNOLOGY  
**CAREER SKILLS FOR EMPLOYMENT**  
WITH AN INNOVATIVE EDUCATION MODEL

**Education and training** that is focused on the high-demand skills required to succeed in an IT job role.

**NuPaths offers multiple career pathways for the growing opportunities in information technology.**

- Develop specific IT skills for well-paying and in-demand jobs
- Earn industry-recognized certifications and college credits
- Prepare for an apprenticeship where you can earn and learn
- Pursue Workforce Innovation and Opportunity Act (WIOA) education funding

## **NuPaths at all Stages of Career Development**

### **High School**

Supplement high school with future ready IT curriculum and outcomes.

### **Underemployed/Unemployed**

Expand your skills to overcome underemployment or unemployment.

### **College Alternative**

Pursue a college alternative at a fraction of the cost and time.

### **Career Transitions**

Transition to the IT field or advance your career in IT.

### **Veterans**

Add IT skills to your military experience for a successful civilian transition.

### **Organizational Training**

Invest in your organization's people for an edge in recruiting and retention.

**Our Mission** | Prepare you to perform specific entry-level roles in Information Technology (IT) for well-paying and in-demand jobs.

NuPathways	NuExperience	NuResults
Programs based on IT employment demands.	Continuous engagement through Active Learning Rotations™.	IT skills, certifications, college credits, apprenticeships.

### PATHWAY OPTIONS

**Cyber Security** | Prevent unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction of digital information.

**Tech Support** | Provide technical support, advice, and assistance to consumers and businesses by installing, maintaining, and troubleshooting computer hardware and software assets.

**Software Testing** | Testing is an enablement service to validate and verify application development quality and system performance prior to the production roll out of applications.

**Digital Marketing** | Work closely with the marketing team to implement, analyze and optimize online advertising, search engine and social media channels.

**Productivity** | Coordinate resources to optimize key processes and increase value for improved stakeholder and organization outcomes.

3-6 MONTHS

OUTCOMES

“At IBM alone, they intend to hire about 25,000 professionals in the next four years in the United States. Due to the evolving nature of technology, many of these IBM jobs do not require a four-year degree, and will be filled by people with a diverse range of backgrounds and qualifications.”

– U.S. Chamber of Commerce Foundation
